Independant Living Accommodation - Market Harborough

This £6m project has seen a complete remodelling creating light, accessible spaces, with new facilities to promote active living, including external works incorporating a protected courtyard garden for residents to enjoy together with a kitchen garden for the residents to grow their own vegetables.

Remodelling the current 49-bedroom site dramatically and creating a 67-bedroom state-of-the-art facility. The mix of one- and two bedroom flats will be modernised with new kitchens, bathrooms, balconies and patio doors.

An existing single-storey building has been demolished to make way for a new linked two-storey structure which will hold the new entrance reception area, and additional support spaces

Work is being carried out over two phases in order to allow residents to move into the new building temporarily, while the second half is constructed.

The transformation of Brooklands Gardens has made it Seven Locks' flagship scheme.
