Primary Care Centre - Cullompton, Devon

Appointed by Haven Health Properties, following their selection as preferred architects by the local GP's, brp architects designed a new build integrated Centre for Health, located on a greenfield site on the outskirts of the village. The overall approach is such that it is designed to benefit and compliment the existing operation methods of the medical practices, improving their efficiency.

Providing accommodation for a ten GP practice the facility is supported by community-based PCT activities. Further to this substantial extra space is provided for complementary therapies, diagnostics,

pharmacy, a health food café plus patient and support groups. Externally areas such as the health food garden and physic garden demonstrate how the scheme exceeds its original remit, helping to promote healing in a holistic environment.

Sustainability was a key consideration, with design features including maximising natural lighting and ventilation together with a Sustainable Urban Drainage System (SUDS).
