Primary Care Resource Centre - Kidderminster, Worcestershire

Selected through national competition brp architects were appointed along with Haven Health Properties and contractor Wildgoose Construction to deliver new premises for the Northumberland House Surgery, Aylmer Lodge Surgery, The Worcestershire Physiotherapy Service and Cohens Pharmacy. The site is honed out of decommissioned accommodation of the Kidderminster General Hospital and the area currently used as formal staff car parking.

As part of the overall project 7,000m² of existing buildings over 9 storeys had to be demolished in a

working hospital environment and 245 staff parking spaces relocated.

Primary care facilities for each practice range over three storeys, located above undercroft car parking.

Whilst contributing to a well defined healthcare community on a defined campus, the new facility has it's own identity and access and is designed as a statement building composed of red brick, render, patent glazing and aged copper effect cladding that turns it's back to the secondary care facility.
