## Supported Living Accommodation - Knights Court, Wellingborough

Forming the centrepiece of a wider regeneration project at Knights Court this 40no. unit new build apartment scheme, with associated resident amenity spaces, provides much needed specialist accommodation for the local community. It is further supported by the comprehensive refurbishment of the three surrounding 1970's apartment blocks.

Using the natural sloping topography the new building utilises a split-level approach in order to ensure a strong physical presence at ground floor on

all sides, as well as clearly defining the parameters between the public and private realm – design features distinctly lacking from the original building that occupied the site.

The contemporary form and aesthetic of the new build also governs the style of the existing blocks to be upgraded, creating a sense of unity across the entire site and reinforces the site as being a key location within Wellingborough.
