Primary Care Centre - Lytham St. Annes, Lancashire

North Lancashire PCT appointed brp architects for the redevelopment of Lytham Hospital. The scheme offers clean, crisp, contemporary interiors that further compliment the award-winning design.

Accommodation is spread over three storeys and provides a total floor area in excess of 4,500m². Facilities provided include a series of GP Consulting Rooms and Treatment Suites which are further supported by a range of PCT services, pharmacy and a healthy-eating café.

Following the original design concept of providing a central core to the facility the scheme adopts a

cruciform plan format with a series of wings that are all accessed from the heart of the building.

Central to the scheme is a full-height atrium that floods the heart of the building with daylight and maximizes the opportunity of natural ventilation, thereby demonstrating that the environmental principles are not necessarily complicated to achieve.

The project was delivered in conjunction with development partner Primary Asset Management.
