## School Refurbishment To Form Medical Centre - Loughborough

brp architects were commissioned through regional competition to design and deliver the refurbishment of this Grade II listed building to relocate the Charnwood Medical Group.

The construction process began, on the former Infant and Junior school, after extensive discussions with the planners and conservation officers. All parties were keen to retain as much of this prominent buildings original character as possible. This included the existing windows being renovated, the main hall being retained to form the waiting room and the external works replicating the original playground.

Any works undertaken were as sympathetic and as in-keeping with the existing buildings as possible.

The scheme was negotiated with a local contractor and supply chain and has been executed as a traditional contract.

The result is an 8 GP practice, treatment suite, adjoining pharmacy and conference facilities within the junior school. The infant school will be refurbished to provide a community centre.
